

SAFE HANDS FOR SOAP DISPENSER SOLUTIONS...

With our comprehensive range, expert advice and extensive stockholding, you can trust us to help you find the perfect soap dispenser for your washroom.

Your ideal soap dispenser... we have it covered!

Our handy guide to help you consider your options

Capacity

Most dispensers have a range from 300ml to 1.8L. High traffic areas need a large capacity. High capacity dispensers require less refilling and servicing.

Manual or Automated

Manual soap dispensers are easy to use, low cost and low maintenance. Non-touch dispensers ensure enhanced hygiene in critical areas.

Liquid Soap and Gel

Provides a more intense clean as you need to work it into a lather when it's in your hands.

Foam Dispensers

These deliver a ready lather which uses less product and water.

Hand Sanitiser Sprays

Some soap dispensers can also dispense disinfectant sprays. Just consider the viscosity of the liquid you want to use.

Complete peace of mind for
all your washroom solutions

YOUR PERFECT CHOICE...

From push button essentials to high-tech luxury, we'll help you find your ideal soap dispenser solution

Food Industry

Healthcare

Public Areas

Schools

Luxury

Value

The extensive range of soap dispensers from Not Just Taps covers use in a complete variety of situations.

From commercial, catering, schools, medical & healthcare environments, you will find the ideal product for your needs.

We have dispensers to suit different budgets and levels of use and our range complies with NHS requirements.

Push-button Operated Soap Dispensers

For manual use and suitable for liquid soap and disinfectant handwashes.

Sensor Activated Soap Dispensers

A range of 'non-touch' units which are cost effective by automatically dispensing the correct amount of soap, reducing wastage. Suitable for liquid soaps, also gels and disinfectant gel handwashes.
